

National Safe Digging Month – Social Media Messages

1st week of NSDM

- **4/1:** Today is the first day of National Safe Digging Month! If you're planning a DIY project or hiring a contractor this spring, remember to always #Call811 before you dig to #KnowWhatsBelow! #AL811
- Since 2008, National Safe Digging Month has been observed every April to remind everyone, homeowners and professionals alike, to always #Call811 before digging to keep communities safe. #CallBeforeYouDig #AL811

2nd week of NSDM

- Dreaming up your next home improvement project this spring? Remember to add calling 811 to your to-do list for any project that requires digging! Calling 811 gets your utilities marked so you can #KnowWhatsBelow and keep yourself and your community safe. #AL811
- **3/15:** #EarthDay is just one week away! If your celebration involves planting a tree, #Call811 today to ensure your utilities will be marked in time. Always #KnowWhat'sBelow by taking advantage of the free 811 service before disturbing the ground in any way. #AL811

3rd week of NSDM

- **4/19:** Fun fact: Before 811 was designated as the national #CallBeforeYouDig phone number, you had to know the 1-800 number for your local notification center. Now it's as easy as making a free call to 811 to have your #utilities marked! #Call811 #AL811
- **4/22:** Happy #EarthDay! Thank you for protecting the earth and your community by calling 811 before you dig for any project, large or small. #CallBeforeYouDig #AL811

4th week of NSDM

- **4/24:** Planning to plant a tree for #ArborDay this Friday? Make sure you #Call811 today to protect yourself and underground #utilities by getting your utilities marked before disturbing the ground.
- **4/28:** Happy #ArborDay! Thank you to all the folks who called 811 before planting trees to keep themselves and their communities safe while making the world a little greener. #NationalSafeDiggingMonth may be ending, but remember to #Call811 before any digging project year-round!
